Continuation of Substance of Interview including description of the general nature of what was discussed: Discussed further amending proposed claim (copy attached) to recited that the core partition is configured to reduce burner flame flicker as disclosed on page 13, lines 2-4. Noted that the proposed addition of reduce burner flame flicker is supported by the statement on page 9, lines 2-4 "... the flicker of the core flame to be smaller...". Examiner noted that the proper addition of this additional limitation to the proposed changes to claim 9 would render the claims allowable. and the case would be ready for allowance if the the non-elected claims are also canceled. .
